14	B
15	C
16	C
17	A
18	C
19	D
20	A
21	D

Writing

Nowadays we live in dynamic and fast-paced world. It's safe to say that the majority of people couldn't even imagine their lives without new technology. It is just how the society works today. Nevertheless, I would like to try to explain whether these changes are positive or negative and how they are connected with freedom.

Firstly, modern technology has had extremely significant effect on the globalization process, which is one of the crucial aspects of the society. Communication between people became more and more comfortable and accessible in human history.

The other thing that technological revolution did pretty well is tightly connected with celebrating multiculturalism. That increased the awareness of cultural diversity in our world. Basically, ~~was~~ it has led to more freedom since people are not scared of expressing their emotions and feelings in public and share them with each other in order to improve mental health ~~and~~ as well as social skills.

Not to mention, there is actually a dark side of the technology. The Internet appears to be one of the most dangerous place due to its accessibility and size. You should always scrutinize all the links and sites that you visit as it might lead to terrible exodus.

To conclude, our contemporary world never stops to surprise us with the variety of new technology we discover.

We can't prevent it to happen, so it is better to try to accept all the upcoming changes and enjoy your life. Personal freedom is one of the greatest achievements in our era and technology helped the humanity to fully understand the true importance of it. I'm absolutely happy to live in such a wonderful world!
